

How To Make A Volcano For Kids

Want to see a volcano erupt right in front you? Then learn how to make a volcano at home with this fun science experiment.

Things You Need To Make A Volcano

- 100 ml of warm water
- 10 ml of dish soap
- 400 ml of white vinegar
- Empty 2-litre soda bottle
- 2 drops of red food coloring
- Baking soda slurry ($\frac{1}{2}$ cup baking soda and $\frac{1}{2}$ cup water)

Steps To Make Your Homemade Volcano

- **Step 1:** Mix the dish soap, water, white vinegar, and food coloring and pour it into the empty soda bottle.
- **Step 2:** Make a baking soda slurry with $\frac{1}{2}$ cup baking soda and $\frac{1}{2}$ cup water. Mix it thoroughly with a spoon, until it's completely dissolved.
- **Step 3:** Now, it's eruption time! Quickly, but carefully pour this slurry into the bottle and step back. Now, watch the volcano erupt and spill out red lava!
